

7th grade investigates Kingfisher

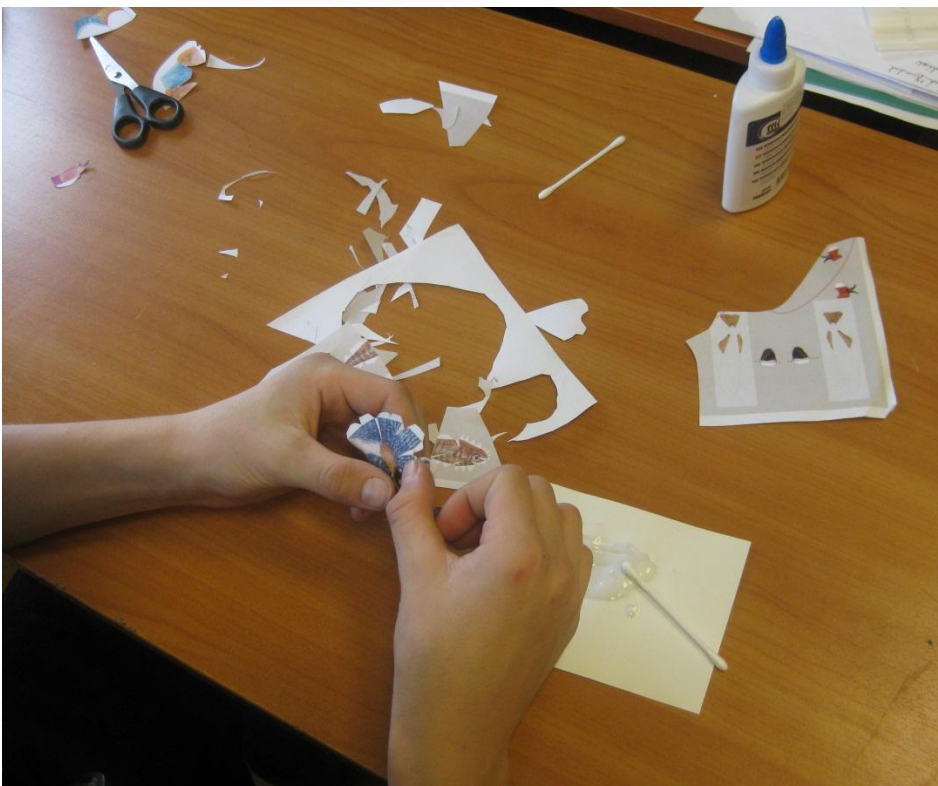

Unbelievable, but it is true, you can also see such a colorful bird in Estonia (and not only in zoo 😊)

Students tried to find as much info they could – reading texts in language lessons, info search in computer science where they learned to make also PowerPoint presentations.

Each student made a passport photo of the bird made by him or her, as passports need a photo.

You can find Kingfisher in South-, South-East and North-Estonia. Kingfisher comes to Estonia at the end of March or early April and leaves the country when rivers freeze.
